THE CONCEPT

- natural light deep in the building
- energy savings (up to 60%, <1.5 yr. payback)
- glare control
- improved occupants’ comfort
**Daylighting Fabric®** – revolutionary, patented optical film with embedded microreflectors

**Targeted End Products:**
- Window film (retrofit)
- Window shades/coverings (retrofit)
- Premanufactured windows (new construction and retrofit)
TECHNOLOGY VALIDATION

- Advanced Building Test Facility (FLEXLAB)
- Optical tests (goniophotometer).
- PG&E-funded study
- Side-by-side comparisons and year-around saving estimates performed

Daylighting effect of the retrofit with Daylighting Fabric
(actual photographs taken with the same exposure before and after window treatment)
